

# SPOTLIGHT

INTERNATIONAL GRADUATE

CHARLES TU

Wuhan, China

“

I've been at Munro for about 4 years, and I think that's my best choice for study. I was studying in China. The teacher in China is really different and won't treat you as a friend. They really care about the school rules and let you follow. If your grades are not good, then they won't give you a lot of support. But at Munro, the teachers are not only teachers, teachers and students get along like friends, you will get a lot of support from teachers, no matter your grades, no matter if you're a good student or bad.

“

In the future, after finishing university or during the university, I will start my sneaker business. My favorite sport is basketball, because of basketball, I came into contact with sneakers and researched the history of sneakers. I was really interested to be a basketball player, because of age issues and training I had no chance, so I put my dream into the sneaker area. I will go find a job first, no matter what the job is, work for a while and save money, then open a sneakers store.
